

MARTILLO ANTIRREBOTE DEAD BLOW HAMMER MARTEAU ANTI REBOND

La amplísima gama de martillos, mazas y macetas EGA Master, tanto con mangos de madera de la mayor calidad como en fibra de vidrio super-resistente, se ve ampliada por las nuevas MAZAS ANTI-REBOTE.

The already very wide range of hammers and mallets, offered both with the best quality wood or super-resistant fiberglass handles, is now extended with the new DEAD BLOW HAMMERS.

La plus grande gamme de marteaux, masses et massettes EGA Master, tant avec des manches de grande qualité, comme en fibre de verre super résistant, se voit agrandie avec les nouvelles masses anti-rebond.

1 Su cabeza rellena de microbolas de acero le da la inercia necesaria para amortiguar y eliminar el efecto rebote.

The steel-ball-filled head gives it the necessary inertia to cushion and eliminate the rebound effect.

Sa tête remplie de microboules en acier, lui donne une inertie pour amortir et éliminer l'effet de rebond.

2 La carcasa hecha de una mezcla de goma especial+PVC, no solo le da la rigidez y resistencia necesarias sino que permite el golpeo de piezas metálicas sin riesgo a roturas o desperfectos, además de amortiguar aún más el impacto.

PVC+Special rubber made cover, provide not only the required rigidity and resistance but it also enables it to impact metal pieces without any risk of damaging or breaking them. Furthermore, it helps to cushion the impact further.

La carcasa faite d'un mélange de gomme spéciale + PVC, non seulement lui confère la rigidité et la résistance nécessaires, mais aussi permet des coups sur les pièces métalliques, sans risque de ruptures ou de détériorations, et en plus d'amortir plus le choc.
